

MY WORK IS A STORY OF HEALTH.

What story will you tell?

Job Title: Quality Engineer II

Location: Chelmsford, MA

Requisition ID:

As part of the Thermo Fisher Scientific team, you'll discover meaningful work that makes a positive impact on a global scale. Join our colleagues in bringing our Mission to life every single day to enable our customers to make the world healthier, cleaner and safer. We provide our global teams with the resources needed to achieve individual career goals while helping to take science a step beyond by developing solutions for some of the world's toughest challenges, like protecting the environment, making sure our food is safe or helping find cures for cancer.

How will you make an impact?

As a Quality Engineer, II, you will be responsible for facilitating and supporting the Success Factors LMS system and overall training program. You will partner with the training program manager and site departments to support the implementation of new training curricula along with recurring/refresher and classroom training to ensure Bedford and Chelmsford sites are in compliance with the ISO13485:2016 standard.

What will you do?

- Ensuring all physical training files are up to date, and all records have been filed.
- Follow up on all OJT training and identify gaps for correction with employees
- Assist with OCPLM basic training actions for POP/Tropix (Training Tracker)
- Secondary SFLMS administrator and support Training Program Manager with administrative SFLMS tasks.
- Create training binders for new employees.
- Shadow for OJT Intro Training for new trainers as available (for future support option)
- Assist with OCPLM basic training actions in SFLMS
- Schedule and set up classroom training for instructors.
- Perform training program audits of both physical and electronic training files
- Investigate and respond to SFLMS issues
- Generate Success Factors LMS reports
- Review OJT/classroom forms for correctness and action accordingly – follow up for corrections and update SFLMS for correct items

How will you get here?

Education:

- Bachelor of Science (BS) from accredited college/university or equivalent experience. Preferred Science or Engineering Degree

Experience:

- Minimum of 2 years of relevant Quality/manufacturing/engineering experience in a regulated industry

MY WORK IS A STORY OF HEALTH.

What story will you tell?

Knowledge, Skills, Abilities:

- Accomplished written, oral and presentational skills
- Must be comfortable working as a team member (multi-functional)
- Have excellent interpersonal, time management, decision-making and conflict management skills
- Good data analysis skills, with an ability to use statistical methods to conduct quality investigations.
- Comfortable in conversing at all levels within the organization
- Ability to perform multiple tasks
- General knowledge of ISO 13485 standards and/or FDA cGMP regulations (i.e 21 CFR 820).
- Computer skills: knowledge of Microsoft Office applications (Word, Excel and PowerPoint) is a must. Knowledge of a statistics data software (Minitab, JMP...etc) is highly desirable.
- Must maintain high ethical standards to support a professional business code of conduct

Our Mission is to enable our customers to make the world healthier, cleaner and safer. Watch as our colleagues explain 5 reasons to work with us. As one global team of 90,000 colleagues, we share a common set of values - Integrity, Intensity, Innovation and Involvement - working together to accelerate research, solve complex scientific challenges, drive technological innovation and support patients in need. #StartYourStory at Thermo Fisher Scientific, where diverse experiences, backgrounds and perspectives are valued.
